# randstad IT solutions

## indigenous internship program

Randstad IT Solutions Indigenous Internship Program offers guided work experience for First Nations, Metis and Inuit students who are looking to explore a career in IT related work. The program will consist of three months of training and work experience with the Randstad IT Solutions team followed by a mentorship program until the end of the year that will work to develop goal setting and industry networking skills. Randstad hopes to provide a rewarding and stimulating experience for all participants, by working on skills development, technical training and offering opportunities to build strengths and confidence in the field of IT.

Randstad Canada is committed to building a diverse workforce reflective of the diversity of Canada. Randstad Canada is also committed to developing inclusive, barrier-free selection processes and work environments. People who would need accommodations for any part of the application process can contact, in confidentiality, Dan Bryson at dan.bryson@randstad.ca / 416.962.8414

**Software Developer (Paid)**

## Software Developer (Paid)
### Randstad Solutions - Professional Services

As a Software Developer Intern for Randstad IT Solutions, you will work closely with our team to support customer engagements. You will have exciting opportunities to gain hands-on learning in a dynamic and fast-paced environment. The experiences you gain will be a perfect foundation for your career in IT! You are a curious, flexible individual who we can count on, just as you can count on us and you will be surrounded by skilled, passionate and enthusiastic teammates.

**What will your job entail**
You will be part of scrum teams as a development intern on various projects. The projects you will contribute to are varied and span across different industries (Transportation, Insurance, Banking, Distribution, E-Commerce to name just a handful). The tech stacks you use are constantly evolving, so you have an opportunity to continuously learn and use new cutting-edge tools.

**What we are looking for**
● You are a technical program student who thrives when you have an opportunity to develop new and evolving solutions.
● You are passionate about using and learning new patterns, technologies and tools.
● You are invested in developing your skills.
● You are curious and flexible, but most importantly, you bring passion.

**Skills you bring to the table**
- Back-end design, coding and deployment (C# .Net, Java, Node.JS, etc... )
- Front End development using javascript, html based tools and frameworks
- Modern architecture paradigms and patterns (e.g.: SOA, REST, Microservices)
- Git -based tools
- Using cloud-based CI/CD operations (test, build and deployment automation)

**How you will benefit by joining our team**
● This position is a door to a wealth of relationships, mentorship, and growth
● 100% remote opportunity role, open across Canada
● Salary range: 18-25$
● You will be provided with the necessary equipment (laptop, headset, etc.)
● No internet? No problem - we will supply you with a high speed internet stick

**About Randstad IT Solutions**
Randstad Solutions is all about offering high-end professional services to help Canadian companies adapt to modern technological paradigms. We thrive in developing foundational relationships across the industry, offering expertise and innovative engagement models to our customers. We're part of the global Randstad family, an international company headquartered in the Netherlands. Randstad was founded in 1960 and has generated 35 billion dollars CAD of revenue in 2019.

Deadline to submit applications: April 30th, 2023
